Forest2Market, Fisher International and Tecnon OrbiChem are three ResourceWise companies with a combined mission – to provide data, analytics, business intelligence and supply chain expertise to the forest products and chemicals industries.

Full Stack Net Developer - Charlotte, NC

Scope of Position

The successful candidate for this position will be the lead developer and technical lead for a suite of C#.NET applications and the related back-end processes and databases. The applications consist of both web based and legacy client / server applications that are used by both customers and internal users. The successful candidate will be responsible for reviewing, augmenting, and improving code written by a team of external / offshore and internal developers. This position will report to the Director of Software Development.

Major Responsibilities
- Act as the lead developer and technical lead for all .NET related applications and processes.
- Act as technical oversight regarding any changes that may affect the .NET applications and related back-end processes and databases.
- Review and coordinate any changes that may affect the .NET applications and related back-end processes and databases.
- Assist in other IT related projects and activities as dictated by the needs of the business
- Participate in IT support coverage for the business

Skills & Abilities
- Proven development experience in a data intensive environment
- Experience designing and implementing high performance, scalable solutions
- Experience with efficient database design
- Experience writing high performance queries, stored procedures, and functions
- Experience designing high performance dashboards using a variety of charting and mapping technologies
- Team leading skills with a focus on collaboration and coaching
- Desire to learn new concepts and technologies
- Experience with Python, HighCharts, Leaflet, SAS, ArcGIS, and the forestry / wood products, the paper industry, or the chemical industry is a plus

Required Experience/Education
- Full stack web and client / server application development using C#, .NET Framework, & MVC
- Web UI development using standard technologies like HTML, CSS, Bootstrap, JavaScript, jQuery, and Ajax
- Database design and development using database systems like Microsoft SQL and PostgreSQL
- Web-based charting and mapping tools like HighCharts and Leaflet
- 5+ years of relevant work experience in addition to a degree
- A degree in Computer Science or similar field
- An additional 5+ years of proven development experience may be accepted in lieu of a degree

Compensation and Benefits
- Compensation is commensurate with experience
- Flexible hybrid work schedule
- Benefits package provided
