

*Forest2Market, Fisher International and Tecnon OrbiChem are three companies with a combined mission – to provide data, analytics, business intelligence and supply chain expertise to the forest products and chemicals industries.*

## SENIOR ANALYST

United States

Fisher International is seeking a Senior Analyst with a global macro-economic view of the pulp and paper industry with strong analytic abilities and data management skills. The successful candidate will be responsible for quarterly unit price data collection, validation, ongoing improvement of the data processing, and management of existing and new data sources. Management of the logistic models will also be part of the job description. The successful candidate will be curious, resourceful, well organized, and have a dedication to detail and accuracy, together with a result-oriented personality.

### Requirements:

- M.S in Economics, Pulp and Paper, or related field
- 5-7 years of experience in paper mill procurement or similar experience
- 5-7 years in analytic role, performing and reporting analysis of data
- Awareness of price levels for the pulp and paper industry at local and global markets
- Strong analytical and quantitative capabilities, including economic theory, mathematics and statistics, and quantitative methods
- Excellent oral and written communication skills, ability to consult with customers to understand project needs
- Ability to communicate complex things in a simple manner, translate data into business insights for internal and external users
- The ability to manage data in MS Excel, Access, SQL Server
- Solid time-management and follow-through skills, with the ability to simultaneously work on and manage multiple tasks and projects with tight deadlines
- Self-motivated, with the ability to work well independently

### Responsibilities:

- The position has responsibility for Quarterly Pricing (Fiber, Fuels, Chemicals, Labor, some Supplies) used in Cost Modeling of Global Pulp and Paper Mills and Corrugated Sheet Plants
- Find sources of pricing data, and organize the collection of that data, and ensure consistent methodology (spot pricing, average pricing, list pricing, etc.). Oversee the retrieval and inputting of the source data
- Design, build and manage processes to fill in missing price information, and to ensure data quality
- Design, build and manage processes to apply regional pricing to individual Paper Mills, including adjustments stemming from a variety of sources (volume discounts, proximity to source and transportation options, etc.)
- Manage a logistics model that estimates the cost of transportation from Paper Mills to selected destinations. Pricing inputs, as well as Ports and 'Lane Management' are included
- Explain price variation quarter to quarter
- Work closely with backend team, and at the same time support consultants in explaining prices and market variations
- Perform analysis of data to identify opportunities to develop and improve existing tools

### Compensation and Benefits

- Compensation is commensurate with experience
- Benefits package provided
- Vacation/PTO offered
