

CONSULTANT

U.K., Europe, or North America

Tecnon OrbiChem, a ResourceWise company, provides the highest quality data, insight, and expertise to those in the petrochemical, fibres, plastics, and biomaterials industries to enable them to make informed decisions in support of more profitable and sustainable growth.

Tecnon OrbiChem has two major business streams:

- Multi-client Market Consultancy – through its online platform OC360, the company provides on-going monthly business reports, global market databases and forecasts for the chemicals industry. The information held comprises worldwide supply/demand balances, capacity, trade data and prices and is used as a benchmark in the industry. Subscription services include ChemFocus, ChemFacts, ChemExpert, and ChemForesight in addition to marketing blogs that highlight important market developments.
- Individual Project Studies - providing consultancy and commissioned, confidential one-off studies on products, supply/demand, pricing, technologies, operations, strategy, feasibility, and due diligence for clients in the Middle East, Asia, the Americas, and Europe.

Tecnon OrbiChem is seeking a candidate with strong general knowledge of the petrochemical industry to further build upon its leading positions.

Primary Job Responsibilities:

- Develop an in-depth knowledge within a particular industry sector to contribute to the company's global industry surveys for pricing, supply, and demand.
- The Consultant will follow developments within a particular industry sector including prices, supply-and-demand issues, and market trends providing timely, insightful commentary for Tecnon OrbiChem customers.
- The Consultant will work with other consultants and Business Managers within Tecnon OrbiChem to coordinate coverage of key industry trends and identify possible new areas of product coverage.
- The Consultant will contribute to Tecnon OrbiChem's platform OC360 on-going monthly business reports and services describing changes to prices, important events and their implication for industry dynamics.
- The Consultant will maintain databases related to specific product groups, including supply-and-demand and plant production capacity.
- The consultant will contribute to blogs and marketing campaigns highlighting important market developments to drive OC360 interest and subscriptions.
- Confident public speaker; comfortable with giving presentations at industry events.
- Once capabilities have been demonstrated, candidate may be required to cover other products and/or regions, in line with the company's business development plan.

Job Requirements & Qualifications:

- Degree Level 2.1, Bachelor's degree, or equivalent
- 3 years or more chemical industry work experience
- Fluency in English necessary
- Excellent writing skills and ability to meet deadlines
- Ability to develop, source and write industry-relevant news

- Familiarity with petrochemical industry product flows, industry terminology and relationships within the chemicals sectors
- Good interpersonal and communications skills, with the ability to network and build new contacts
- Positive attitude, flexible nature, and helpful disposition
- A quick learner with strong team spirit but also willing to work independently
- General interest in and ability to write about and discuss macro-economic and business intelligence relevant to the chemical industry.
- Ability to work from home, access to reliable internet and communications equipment
- Good organizational and time-management skills
- Ability to always maintain professionalism and confidentiality
- Business travel for client visits or conferences

Compensation and Benefits

- Salary commensurate with experience
- Benefits package provided (including health and wealth management programs, paid time off/holiday, company observed public holidays, and more.)
