EMPOWERING INFORMED BUSINESS  
DECISIONS ACROSS THE FOREST  
PRODUCTS VALUE CHAIN

**ResourceWise**

# Your Gateway to the Forest Products Value Chain

Welcome to the future of forest products commodity intelligence with Forestat Global. Unlock unparalleled insights into the forest products value chain, driving profitability and informed decision-making. Say goodbye to waiting for reports—Forestat Global delivers on-demand data accessible from any browser on any device, putting powerful insights at your fingertips.

## Elevate Your Understanding of the Market

Not only does Forestat Global complement our existing offerings, but it also provides you with a distinctive and enhanced view of the market, with no data contribution required. By seamlessly combining a distinct subset of data from our suite of business intelligence platforms with new datasets, Forestat Global delivers an enriched understanding of the market landscape.

## Inform Your Decision-Making

Forestat Global equips you with an array of powerful features designed to guide your business toward success.

- **Broad Market Insights:** Gain a high-level understanding of market economics by product and region. Access real-time data on pricing, costs, margins, site-level capacity, production, demand, and trends, all in one place.
- **Strategic Analysis:** Dive deep into operating rates and margins across major grades and regions.

- **Profit Chain Visibility:** Calculate margins at each value chain stage to pinpoint opportunities for increased profitability.
- **Predictive Power:** Forecast changes using key supply chain drivers. Stay ahead of market shifts and make proactive decisions.

## Forestat Global Features

### Data Filters

Filters are available for every view on the platform. You can even save your filters and set default views using your saved filters to hone in on the data you need quickly.

You can filter on everything from:

- Forest product segment, such as recovered fiber or market pulp
- Products within each segment, such as OCC or pulpwood
- Data types, such as pricing or production
- Country, currency, and unit of measure

# With Forestat Global, you can:

- Get a high-level view of market economics, including pricing, costs, margins, site-level capacity, production rates, and demand trends.
- Predict market changes by understanding pivotal supply chain drivers.
- Eliminate uncertainties and surprises by gaining unparalleled visibility into the forest products supply chain.
- Analyze operating rates and margins across key grades and regions for precise insights.
- Uncover areas of opportunity by calculating margins at each value chain stage.
- Guide your strategic decision-making process, enhancing profitability, reducing costs, and minimizing risks.

## Interactive Charts, Tables, and Maps

Every chart, table, and map on the platform is interactive, allowing you to:

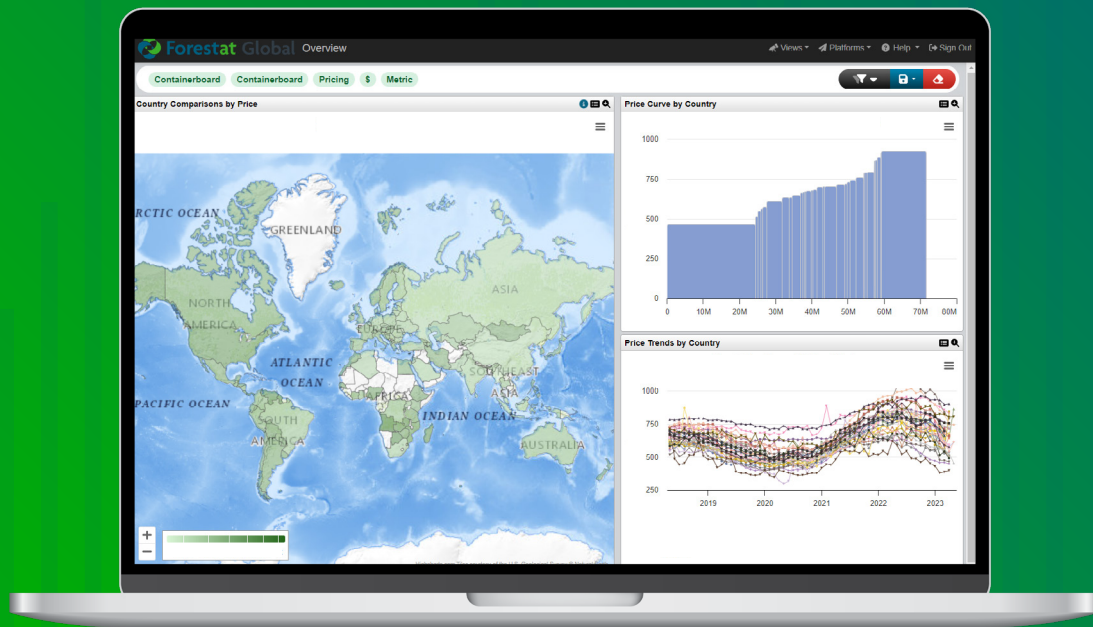

- Click on elements in chart legends to include or exclude that data from the view.
- Highlight items in tables to print or export only the selected rows.
- Toggle between charts and tables with the click of a button.
- Expand any chart or map within a view to focus on only that information.

## Forestat Global Views

- **Overview:** Get a snapshot of forest product sites by country and apply filters to view price averages, curves, and trends by country.
- **Price Detail:** Analyze current vs. historical prices, price trends, related input price trends, and indexed prices.
- **Demand Detail:** Review product import and export, production balance, and production, demand, and utilization trends.
- **Market Share Detail:** Assess production capacity by country with our capacity site map, capacity trends chart, and HHI score.
- **Cost Detail:** Evaluate product cost trends, cost curve by site, and finished goods prices and gross margins.
- **Trade Detail:** Examine product imports and exports by country with our interactive trade flow map, trade wheel, and monthly reported trade volume chart
- **News:** Gain access to curated articles covering a range of topics, including products and technology, site closures and openings, prices and supply, and more. Filter the library of articles using topic tags, date ranges, and search terms.

Are you ready to revolutionize your business decisions with Forestat Global? Elevate your market understanding, drive profitability, and make decisions with confidence.

## About ResourceWise

ResourceWise was launched in 2021 to unify a portfolio of commodity price reporting and strategic consulting companies. These companies focus on forest products, low-carbon fuels, biomaterials and chemicals and include Fisher International, Forest2Market, Wood Resources International, Prima Markets and Tecnon OrbiChem.

For decades, these legacy brands have focused on one mission: helping our customers make exponentially better decisions by providing them with the most accurate data and analytics available in the market, which are supplemented with high-value strategic consulting based on both our data and our decades-long experience.

Commodity markets are complex, volatile and energy-intensive; increasingly, we are using the data and experience we have spent decades compiling to help our customers optimize their operations and navigate the pivot to a lower carbon, more circular economy.
